

# Instruction manual

Multidrill tool for creating a precisely fitting  
step borehole

Copyright © 2024 Kletterwald Plochingen GmbH

Any form of reproduction and translation, even in part, as well as the storage, processing or distribution using electronic systems is not permitted without the written permission of Kletterwald Plochingen GmbH.

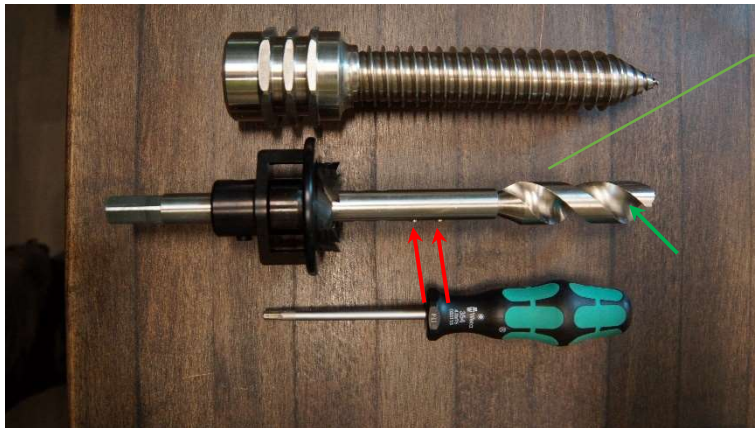

Be sure to read this instruction manual before use to ensure safe handling of the Kletterwald Plochingen product.

The builder must make this user manual available to the assembler and ensure that the assembler has read and understood it.

Store the user manual adequately protected for future use. Leave a visible note in the work area indicating where it is stored.

When creating a borehole with the Multibohrer, among others, the following technical standards and accident prevention regulations must be observed:

- BGI 533 Safety when working with hand tools
- DGUV Rule 112-192 Use of eye and face protection
- BG Rule Use of protective gloves
- 3.21 Hand-held machines (Class no. 61)
- EN 61029-1:2000-05 Safety of portable motor-operated electric tools
- BGHM Occupational Safety Compact No. 011 Working with hand drills
- EN 15567-1:2020-05 Sports and recreational facilities - Rope parks - Part 1: Design and safety requirements

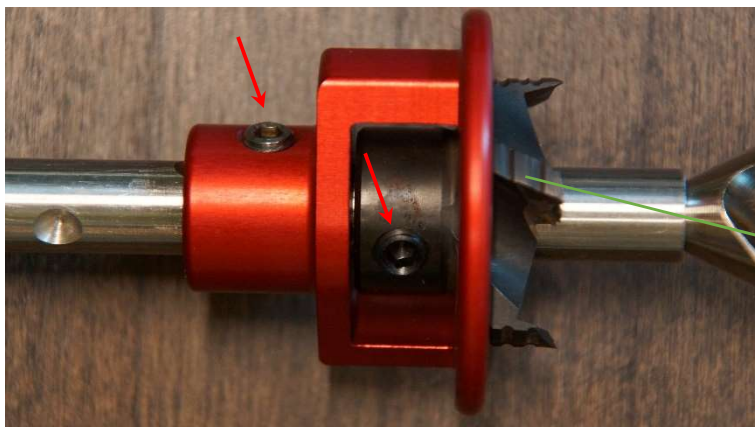

Select the drill diameter that matches the screw.

The **Multibohrer** can be changed by loosening the two hex screws.

**IMPORTANT:** before tightening the two hex screws, align the surface of the drill shaft (hex) perpendicular to the two hex screws.

Set the position of the counter sink and the depth stop, depending on the screw type.

The position of the counter sink and the depth stop can be adjusted to the screw length by loosening the two set screws.

The creation of a step borehole is now carried out, taking into account the installation instructions for platform bolts ("Rev A // 06-06-2024") and with the use of a cordless screwdriver with a spirit level or a drilling jig.

NOTES:

---

We thank you for your trust in our products.

We hope that you are satisfied with the information and instructions and that our Multibohrer tool saves you time and improves the precision of your drilling. If you need further assistance, we are always available.

phone        +49 (0)152-34168948

mail         office@babo-solutions.de

We wish you every success in using our Multibohrer tool!
